

**bloc**

BlocOut is a highly innovative roller blind system which combines an aluminium cassette with precision engineered side rails to completely BlocOut light and draughts.

Winner of the "Best Energy Saving Product or Service" at the BBSA Awards and a Silver Medal Winner at the House Beautiful Awards for best Eco Product this blind can provide a genuine difference to your heating bills. BlocOut is the first blind to have been independently thermally tested by the BBA and has been proven to save up to 43% on average heating costs.

When combined with the right fabrics the BlocOut Blind can also bring complete and total darkness to a room. These possibilities bring this range of blinds an added functionality that is just not possible to achieve with any other blind currently on the market.

# BlocOut Max Roller Blind

BlocOut Max is capable of blocking light and draughts thanks to the exceptional quality of its individual components. Each part, from the brushed seals to the cassette holder and aluminium frames are designed to last, providing added reassurance and flexibility for changing blind fabrics as often as required. BlocOut blinds come in a wide range of colours and patterns to suit all environments.

Curtains trap hot air and prevent it circulating a room. This can promote heat loss. Bloc Out creates an energy efficient barrier that minimizes heat loss and leaves radiators free to heat a room faster.

Bloc blinds incorporate a number of specially developed features that make our blinds superior to others on the market. (1) Rubber seals create a barrier between the blind and the window sill, blocking out light and preventing heat loss. (2) Clips are attached to the fabric

to ensure the blind stays securely within the runners at all times. (3) The fabric is completely enclosed, reducing fading and significantly extending the life of the fabric. (4) Brush seals offer the highest possible degree of light exclusion and draught prevention.

## Fitting Options

## Product Specification

### Size Range

min width	400mm
min drop	300mm
max width	2400mm
max drop	2400mm

### Roller Tube

Aluminium

### Cassette Colour

White / Cream / Anodised Silver

### Bottom Detail

Handle colour to match cassette / Fabric / Venetian strip

### Control

Friction / (Motorised 12V rechargeable battery)

### Fabric Position

Reverse Roll

### Control Side

Right hand side / (Left hand side)

### Clutch

32mm

### Fabric Position

Standard Roll

### Safety Device

Safety Clip

### Interchangeable Pelmet

Fabric matching pelmet / Contrasting fabric pelmet

## Operation, Care and Maintenance

### Operation

Operation of the blind is through a spring system operated by the handle at the bottom of the blind. The blind simply pulls down through the side channels locking whenever the handle is released. The handle is then pushed in towards the window releasing the lock which enables the spring to retract the fabric. It complies fully with all relevant child safety standards.

### Care Instructions

We are all very proud of our stunning BlocOut blind range. To keep them looking their best for years to come, always ensure that your BlocOut blinds have been securely fitted, use a synthetic or feather duster and refrain from using soap and water. Should any part of the blind fail contact our dedicated Customer Service team who can help.

### Maintenance

All our BlocOut blind components are manufactured using aluminium and plastic. They do not present any corrosion problems in normal environments. The system has been designed for smooth operation, together with rigidity to prolong the window blind's working life. Manufacturing and installation guidelines for the size restrictions for each type of installation are included in this specified brochure.

## Child Safety

Being a family run business, we know the importance of safety in a home. That's why every one of our designs is guided by our own 'Safe by Design' principles and fully comply with the latest European directives. Consequently many of our blinds have no cords or chains which could act as a choking hazard and those which are chain operated come with a wall secure system which prevents cords from becoming loose.
