

blocblinds

The Bloc Premium Zebra blind features a smart design that gives you innovative style and light control in one clever and convenient system.

The Zebra blind works via a continuous loop of striped, high quality material. This simple, but stylish mechanism is a contemporary alternative to traditional privacy nets. By controlling the light that enters the space, this bold style also maintains a degree of privacy.

Safety Clip

Operation, Care and Maintenance

Operation

Operation of the blind is through a remote control system. It can also be operated by hand, utilising friction. Complies fully with all relevant child safety standards.

Care Instructions

We are all very proud of our innovative Premium Zebra blind range. To keep them looking their best for years to come, always ensure that your BlocOut blinds have been securely fitted, use a synthetic or feather duster and refrain from using soap and water. Should any part of the blind fail contact our dedicated Customer Service team who can help.

Maintenance

All our BlocOut blind components are manufactured using aluminium and plastic. They do not present any corrosion problems in normal environments. The system has been designed for smooth operation, together with rigidity to prolong the window blind's working life. Manufacturing and installation guidelines for the size restrictions for each type of installation are included in this specified brochure.

Child Safety

Being a family run business, we know the importance of safety in a home. That's why every one of our designs is guided by our own 'Safe by Design' principles and fully comply with the latest European directives. Consequently many of our blinds have no cords or chains which could act as a choking hazard and those which are chain operated come with a wall secure system which prevents cords from becoming loose.
